INTEGRATE RAPID API

```python
import requests,json
from flask import Flask,render_template

app = Flask(__name__)

url = "https://news-api14.p.rapidapi.com/top-headlines"

querystring = {"country":"us","language":"en","pageSize":"10","category":"sports"}

headers = {
        "X-RapidAPI-Key": "25fe4c134cmsh2998c03a51ef787p13796bjsne1b8bb773157",
        "X-RapidAPI-Host": "news-api14.p.rapidapi.com"
}

def getnews():

        response = requests.get(url, headers=headers, params=querystring)
        d=json.loads(response.text)
        dict=d['articles']
        print(dict[0]['title'])
        return render_template("newspage.html",dict=dict)
```
